LAB 3 – INDIVIDUAL COMPONENT DIAGRAM

Community Lost & Found Matching Network — Problem Statement #59

Student: Sarayu Mayakonda SRN: PES1UG24CS926 Course: UE24CS341A

Component scope: The diagram translates the Lab 1 use cases — Report Lost Item, Post Found Item, Extract Item Tags, Claim Item, Verify Ownership, View Contact Info and Manage Listings — into software components. The individual emphasis is the matching and ownership-verification portion of the system.

Component	Responsibility
User Interface	Entry point for reports, claims, matches and verification prompts.
Item Report Manager	Creates and retrieves lost/found item records.
Tag Extraction	Extracts text/visual item tags.
Matching Engine	Matches lost/found items using category, color tags and location.
Claim & Ownership	Handles claims and proof-of-ownership verification.
Listing Manager	Supports Community Admin listing management.
Notification	Dispatches match/claim notifications.
Data Persistence	Stores item, claim and related system data.
Contact Info	Releases protected contact information after verification.
